RENGANATHAN RAMASAMY

Senior QA Engineer | QA Automation | Test Lead

Chennai, India | | rrenganathan96@gmail.com | linkedin.com/in/renganathan18

PROFESSIONAL SUMMARY

Senior QA Engineer with 9+ years of experience in software quality assurance, encompassing functional, regression, UI automation and API testing across Healthcare, Insurance, Retail and Enterprise platforms. Hands-on experience in UI automation using Playwright with TypeScript and Cucumber BDD, Selenium with Java and TestNG, and API automation using REST Assured and Postman. Experienced in testing Spring Boot-based backend applications, validating Kafka integrations and performing database testing using PostgreSQL and MS SQL. Proficient in test planning, test strategy, requirements traceability, defect management and Agile delivery, with experience across ServiceNow ITSM, Guidewire PolicyCenter and BillingCenter, and Amazon Connect IVR. Additionally, experienced in QA team leadership and leveraging AI and AI Agents to enhance testing and automation processes, supporting efficient and scalable software delivery.

SKILLS MATRIX

Test Engineering	Test Planning • Test Strategy • Test Case Design • STLC • RTM • Defect Lifecycle
Testing Types	Functional • Regression • Smoke • Integration • SIT • UAT • Exploratory • Black-box
Programming Languages	Java • JavaScript • TypeScript
UI Automation	Playwright • Selenium
API Testing & Automation	REST Assured • Postman • SOAPUI
Backend & Integration Technologies	Spring Boot • Kafka
Automation Frameworks	Cucumber BDD • TestNG • Page Object Model (POM) • Data-Driven Testing
Database & Development Tools	MS SQL • DBVisualizer •PostgreSQL • VS Code • IntelliJ IDEA • Eclipse
CI/CD & Version Control	GitHub Actions • Jenkins • Maven • Git • GitHub Desktop
AI-Assisted Testing	AI Agents • MCP • Microsoft 365 Copilot • GitHub Copilot
Domain Platforms	ServiceNow • Guidewire PolicyCenter • Guidewire BillingCenter • Amazon Connect IVR
Test Management & Tools	JIRA • HP ALM • TestRail
ServiceNow Functional Areas	Incident Management • Change Management • Problem Management • Service Catalog • Order Guides • Approval Workflows • RITM/SCTASK Lifecycle • Request Fulfilment • Catalog Form Modifications • Approval Rule Configuration • User, Group & Role Management

PROFESSIONAL EXPERIENCE

Tata Consultancy Services | IT Analyst **Feb 2022 – Present | Chennai**

Client: Sainsbury's | Domain: Retail

- Perform sprint-based functional testing for Master Data Management (MDM) workflows supporting retail supply chain operations.
- Develop and execute API automation suites for Spring Boot-based backend services using REST Assured, Java and Cucumber BDD.
- Design, develop and maintain UI automation tests using Playwright and TypeScript with Cucumber BDD, extending existing API and UI automation frameworks when required.
- Validate database operations across PostgreSQL tables, covering record creation, updates and deletions, with database access through AWS EC2.
- Validate Kafka message production and consumption across upstream and downstream systems, ensuring data changes trigger the expected event flows.
- Leverage a custom AI agent integrated through MCP to generate test cases and automation scripts from user stories, Confluence documentation and business use cases.
- Collaborate with business analysts and product owners to refine requirements and improve the accuracy of AI-generated test scenarios.
- Trigger and monitor automation builds through GitHub Actions as part of the CI workflow, supporting regular test execution and validation.

Client: Mercury Insurance | Domain: Insurance & Enterprise Services

- Independently designed and developed a Selenium WebDriver automation framework from scratch using Java, TestNG, Page Object Model and data-driven testing, integrating Jenkins for execution and Maven for build and dependency management, with Git-based pull request workflows.
- Performed end-to-end functional testing of ServiceNow ITSM/WESS workflows across Incident, Change, Problem and Service Catalog, including catalog items, order guides, multi-level approvals, RITM/SCTASK lifecycle and request closure.
- Authored test plans and strategies for ServiceNow WESS modules and maintained RTMs at 100% requirement coverage per sprint, running functional, regression, smoke, SIT, and UAT cycles across ServiceNow and Guidewire with defects triaged in JIRA.
- Designed and executed functional test cases for Guidewire PolicyCenter and BillingCenter, covering invoicing, payments, refunds, write-offs and delinquency. Tested P3 payment gateway scenarios using card and eCheck payment methods, including installment-date-change scenarios, with API validation through Postman and backend data verification using MS SQL.
- Validated end-to-end IVR call-handling logic, prompt accuracy, and backend data consistency for the Avaya-to-Amazon Connect migration across 150–200 IVR call flows for Billing and Claims operations — contributing to a successful go-live.
- Maintained TestRail suites; produced sprint-level defect density reports to support release decisions.

Accenture Solutions Pvt Ltd | Test Engineering Senior Analyst **Jun 2017 – Jan 2022 | Chennai**

Client: Kaiser Permanente | Domain: Healthcare

- Led an 8-member QA team as module test lead within a 100+ member project; mentored junior testers in automation practices and Agile QA standards.
- Served as Offshore Point of Contact (POC); delivered daily test progress updates to onshore stakeholders and coordinated UAT preparation including test summary reports and release sign-off.
- Maintained and enhanced existing Selenium WebDriver automation scripts using Java and TestNG for the eCIMS healthcare application, working with Page Object Model, Page Factory and data-driven testing approaches.
- Authored Test Strategy documents covering smoke, black-box, integration, functional, and regression test cycles; maintained RTM to ensure 100% requirement coverage across major releases
- Managed a regression suite of approximately 2,000 test cases and executed 200–400 functional end-to-end test cases during each feature release cycle, along with feature-specific regression testing.
- Designed and executed functional, regression, smoke, SIT and UAT test cases; logged and managed defects through JIRA and HP ALM, including triage, tracking, closure and root-cause analysis of recurring issues.
- Executed end-to-end SOAP/REST testing via SOAPUI and Postman; performed SQL validation to verify data consistency between API responses and backend records.
- Contributed to Agile ceremonies including story estimation, sprint planning and retrospectives, collaborating with business analysts and developers on requirements and test alignment.

CERTIFICATIONS

Google Gemini Enterprise Agent Development	Google
Google Gemini Enterprise Deployment	Google
Certified SAFe® 5 Practitioner	Scaled Agile Inc.
ServiceNow ATF Micro Certification	ServiceNow
Advanced Agile: Leadership Techniques	Skillsoft
Certified Agile Software Development – Scrum	Skillsoft
Selenium Automation Certification	TestLeaf Pvt Ltd

EDUCATION

B.E. — Mechanical Engineering
SRM Valliammai Engineering College, Anna University
2013 – 2017 | CGPA: 7.7 / 10

AWARDS & RECOGNITION

- ACE Award FY2020 — Accenture Celebrates Excellence; awarded for outstanding delivery performance.
- On the Spot Award — Accenture; recognised for exemplary contributions to project success.
